

Final update – 27/09/06

Our stay is now almost over, and so is the DVD project. We have done our final filming and found out how we want the DVD to be put together. The last filming was supposed to be at Ferolois, a mining place close by GGA, but we weren't allowed to film there, not even outside the fences. Therefore, we went to Sizwe's place again. There they had some machines and trucks doing some work, so we got some footage for our working songs. The day after, we started looking at the footage and deciding what song to put on the DVD. We had a lot of film and many songs, but we didn't have time for more than 20 songs. The final touches were done yesterday night. Linus, a German volunteer at GGA, helped Heather to make the cover for the DVD yesterday. Yesterday was also the day that the name for the DVD was chosen. The name for the DVD is **Shosholoza**. Tim, who has recorded and worked with the sound, will give the CD with all the songs to Heather tomorrow. Then Heather will drive to Nelspruit on Thursday and give the music and film to a man called Marius, who will put the sound over the pictures and put it together on the PC, and onto a DVD. This job will be finished before October 6th, so that Heather can take the finished DVD with her to Europe.

We are all very anxious to see the final product. Hopefully the DVD can be something the Young Zulu Warriors and GGA can earn some money from by selling the DVD, but also used to promote YZW and GGA. We would like to take the opportunity to thank Heather, GGA and the YZW for the wonderful time we have had here.

Best regards  
Astrid, Solveig, Hege and Lars

Below are our final images:

At GGA practicing one of the scenes being shot later that day

Wedding party arriving from far away to the celebration

Old lady living at the place we were filming
